Coronavirus Disease 2019 (COVID-19)
Stop the Spread

Know How it Spreads:
- There is currently no vaccine to prevent coronavirus disease 2019 (COVID-19)
- The best way to prevent illness is to avoid being exposed to this virus
- The virus is thought to spread mainly from person-to-person
  - Between people who are in close contact with one another (within about 6 feet)
  - Through respiratory droplets produced when an infected person coughs, sneezes or talks
  - These droplets can land in the mouths or noses of people who are nearby or possibly be inhaled into the lungs
- Some recent studies have suggested that COVID-19 may be spread by people who are not showing symptoms

Everyone Should:

Clean your hands often
- Wash your hands often with soap and water for at least 20 seconds especially after you have been in a public place, or after blowing your nose, coughing, or sneezing
- If soap and water are not readily available, use a hand sanitizer that contains at least 60% alcohol. Cover all surfaces of your hands and rub them together until they feel dry
- Avoid touching your eyes, nose, and mouth with unwashed hands

Avoid close contact
- Put distance between yourself and other people and avoid close contact with people who are sick
- Stay home as much as possible
- Remember that some people without symptoms may be able to spread virus
- Keeping distance from others is especially important for people who are at higher risk of getting very sick

Cover your mouth and nose with a cloth face cover when around others
- You could spread COVID-19 to others even if you do not feel sick
- Everyone should wear a cloth face cover when they have to go out in public, for example to the grocery store or to pick up other necessities
- Cloth face coverings should not be placed on young children under age 2, anyone who has trouble breathing, or is unconscious, incapacitated or otherwise unable to remove the mask without assistance
- The cloth face cover is meant to protect other people in case you are infected
- Do NOT use a facemask meant for a healthcare worker
- Continue to keep about 6 feet between yourself and others. The cloth face cover is not a substitute for social distancing

Cover coughs and sneezes
- If you are in a private setting and do not have on your cloth face covering, remember to always cover your mouth and nose with a tissue when you cough or sneeze or use the inside of your elbow
- Throw used tissues in the trash
- Immediately wash your hands with soap and water for at least 20 seconds. If soap and water are not readily available, clean your hands with a hand sanitizer that contains at least 60% alcohol

Clean and disinfect
- Clean AND disinfect frequently touched surfaces daily. This includes tables, doorknobs, light switches, countertops, handles, desks, phones, keyboards, toilets, faucets, and sinks
- If surfaces are dirty, clean them. Use detergent or soap and water prior to disinfection
- Then, use a household disinfectant. Most common EPA-registered household disinfectant will work

Santa Fe Springs Initiates General Plan Update

Do you have ideas to share about creating a new vision and guiding principles for the future of Santa Fe Springs? The City wants you to participate in shaping the City’s future. How? By getting involved in the General Plan update process. The General Plan serves as the City’s primary guide for future planning and development decisions. It is the City’s blueprint, or constitution, to guide change. The current General Plan was adopted in the 1990s. In this rapidly evolving world, updating the General Plan will result in new long-range planning documents that work together to maintain the uniqueness of Santa Fe Springs and create opportunities for improvement in how we manage every aspect of our City—including economic growth, transportation, housing, climate change, current challenges, emerging trends, and many more.

The General Plan touches many topic areas, such as where housing can be built, where new commercial businesses are needed, how the road network can better accommodate cyclists and pedestrians, how parks can be improved, and how public safety is addressed in our daily activities, including exposure of people to noise and air pollutants.

Community input is essential to developing a vision with goals and policies that will launch the vision into action. Using an intensive, inclusive, and creative community engagement process, this planning effort will ensure that all community voices are heard. Please monitor the designated General Plan website www.reimaginesantafesprings.org and social media posts for upcoming online interactive events and information.

Use of Cloth Face Coverings to Help Slow the Spread of COVID-19

How to Wear Cloth Face Coverings

Cloth face coverings should –
- fit snugly but comfortably against the side of the face
- be secured with ties or ear loops
- include multiple layers of fabric
- allow for breathing without restriction
- be able to be laundered and machine dried without damage or change to shape

CDC on Homemade Cloth Face Coverings

CDC recommends wearing cloth face coverings in public settings where other social distancing measures are difficult to maintain (e.g., grocery stores and pharmacies), especially in areas of significant community-based transmission.

CDC also advises the use of simple cloth face coverings to slow the spread of the virus and help people who may have the virus and do not know it from transmitting it to others. Cloth face coverings fashioned from household items or made at home from common materials at low cost can be used as an additional, voluntary public health measure.

Cloth face coverings should not be placed on young children under age 2, anyone who has trouble breathing, or is unconscious, incapacitated or otherwise unable to remove the cloth face covering without assistance.

The cloth face coverings recommended are not surgical masks or N-95 respirators. Those are critical supplies that must continue to be reserved for healthcare workers and other medical first responders, as recommended by current CDC guidance.

Should cloth face coverings be washed or otherwise cleaned regularly? How regularly?

Yes. They should be routinely washed depending on the frequency of use.

How does one safely sterilize/clean a cloth face covering?

A washing machine should suffice in properly washing a cloth face covering.

How does one safely remove a used cloth face covering?

Individuals should be careful not to touch their eyes, nose, and mouth when removing their cloth face covering and wash hands immediately after removing.

For simple face cloth covering sewing patterns and no sew methods, visit cdc.gov/coronavirus.

Please Note
