TO: City of Santa Fe Spring Residents
FROM: Noe Negrete, Director of Public Works
SUBJECT: I-5 Pre-construction Mitigation Phase II - Telegraph Road, Orr & Day Road, Pioneer Boulevard and Florence Avenue “Resurfacing & Reconstruction”

In anticipation to the I-5 widening project (Orange County Boundary to I-605 Freeway) within the next few years, the City of Santa Fe Springs is pursuing a construction contract aimed at minimizing and mitigating the potential impacts to its residents. The contractor for this project is Sully-Miller Contracting Company of Brea, California.

The limits of the City project are as follows:

- Orr & Day Road, From Florence Avenue to Telegraph Road
- Florence Avenue, From Orr & Day Road to Norwalk Boulevard
- Telegraph Road, From Cedardale Drive to Pioneer Boulevard
- Pioneer Boulevard, From Lakeland Road to Telegraph Road

The work in general consists of the following (listed in the appropriate order of work):

- Remove and reconstruct curb ramps, curb and gutter, and median noses.
- Remove and replace some deteriorated asphalt concrete pavement.
- Place asphalt rubber hot mix overlay.
- Restripe and replace pavement markers.

The improvement work will be pursued in two separate and sequential phases:

Phase I: Orr & Day Road and Florence Avenue (June 28, 2013 thru end of July 2013)
Phase II: Telegraph Road and Pioneer Boulevard (End of July 2013 thru end of August 2013)

This project is being implemented under a very aggressive schedule in order to complete the work prior to the start of the school year and take advantage of the lighter traffic load. Some night and weekend work is anticipated, however nearby residents will be given a 48 hour notice prior to that occurring.

Daily roadway work will take place off peak hours, from 9:00 am to 3:30 pm for major highways and 8:00 am to 5:00 pm for residential streets. Night work will start no earlier than 7:00 pm and will conclude no later than 5:00 am. Any unanticipated deviations from these times will be promptly conveyed to the local residents.

The City and the Contractor will diligently make all efforts to stay on schedule and meet all the projected milestones and scheduled activities. If deviations occur because of unanticipated events outside of our control, the schedule will be adjusted accordingly and efforts will be made to bring the work back to meet the original deadlines.

If you have any questions or concerns at any time regarding the proposed project improvements, or the scheduled work, please contact Francisco Alonso, Construction Manager at (562) 409-7540 extension 7543.
